

# UI750 Flexible. Active. Comfortable. Perfect.

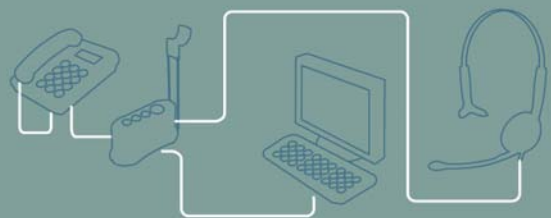

- ▶ The only **active universal interface** box which offers **all** comfort and convenience features
- ▶ Depending on the strength of the incoming signal, **Dynamic Volume Control™** acts to raise or lower the volume to achieve the exact pre-set comfort level
- ▶ Automatic power save function for extremely long battery lifetime of up to 2 years

The top-of-the-line active box UI 750 enables the user to switch between PC and telephone, headset and handset for maximum convenience. This box is absolutely user friendly and easier to set up than regular boxes.

- ▶ **Dynamic Volume Control™** prevents sudden noises from being uncomfortable to the wearer and ensures the person on the other end of the line is clearly understood
- ▶ **Three position switch** guarantees easy installation
- ▶ Compatible with almost every digital and analogue telephone for easy planning
- ▶ The microphone mute allows the wearer to privately converse with others close by
- ▶ Features a particularly modern design as well as an ergonomic, discreet cable connection
